Paletta

Paletta

Zeelandia is producing a unique range of glazing jellies under the name Paletta. Paletta protects the fruit and gives it a glossy appearance with a natural colour. The jellies support the taste of the fruit and give your pastry products a superb fresh look.

The Paletta range contains:

- Paletta & Paletta Extra
- Paletta Luxury
- Paletta ColdJel

Paletta & Paletta Extra

Paletta and Paletta Extra do have an outstanding fruity taste. It can be applied manually or with a spraying machine, because it does not contain fruit particles. The Paletta Extra can be applied directly from the bucket as a pastry filling. Paletta has 3 different flavours: Neutral, Apricot and Strawberry. The Paletta Extra is available in the flavours Neutral and Apricot.

Paletta Luxury

The Paletta Luxury contains real fruit and therefore it has a superior, real fruity Strawberry or Apricot taste. It can also be used straight from the bucket, without adding water, as a fruit filling for your pastry.

How to use

Both the Paletta (Extra) and the Paletta Luxury are freeze stable and have the same how to use. After adding 25-50% of water it must be heated to approximately 90-95° C.

Packaging: 12,5 kg and 6 kg, sealed bucket.

Paletta ColdJel

Paletta ColdJel is a multi purpose, ready to use, cold setting gel. It is providing a high gloss mirror glaze and is suitable for coating and decorating a wide range of confectionery products, including fruit tarts and bavaroise. Paletta ColdJel from Zeelandia can be used as a cold setting jelly, a piping jelly or a mirror jelly. It can be flavoured or coloured to taste.

How to use

Pour Paletta ColdJel in a bowl. Blend carefully with a whisk or a spatula. It can be applied with a spatula or a piping bag or used for dipping. Allow the Paletta ColdJel to stand for 15 minutes before cutting.

Packaging: 6 kg, sealed bucket.
